Where You
Need It

Stylish Solutions
for Ceiling to
Floor Delivery

Typical Applications

- Retail Checkouts
- Open Offices
- Laboratories
- Workshops

- ✓ Power and data communication delivery from the ceiling to the floor
- ✓ Sturdy lightweight extruded aluminum construction
- ✓ Varied configurations for a range of applications

Bryant's family of multi-service service pole products provide electrical and telecommunications wiring needs wherever they are needed. Designed for ease of installation, Bryant service poles come factory wired with Bryant decorator receptacles in a variety of device configurations. All Bryant service poles are fitted with an internal divider to separate power and low voltage wiring.

Service poles are used in many commercial applications as an alternative to floor boxes. These products are designed for permanent or semi-permanent installation and are built to last. They are made from tough and attractive aluminum and are equipped with a scuff boot to prevent damage. Bryant service poles can deliver standard electrical needs as well as provide surge suppression and isolated ground solutions. A blank pole is offered which does not have devices or wiring to meet custom configuration needs.

Ordering Information

Standard Duplex

- Multi-service, two 20A 125V decorator duplex receptacles, one circuit

Color	10' 2" (3.10m)	12' 2" (3.71m)	15' 2" (4.62m)
